To calculate the required handicap pick the average that your new player is closest to and use the handicap that is assigned.

To play the game of singles the 2 players have a handicap applied to their average.

The player with the lowest handicap takes away the handicap of their opponent.

The remaining handicap is added to 501. If player "A" has 27 Handicap and player "B" has 112 Handicap

the difference is 85 - this is added to 501, player "A" will play 586 and player "B" will play 501.

Please take note - The player with the **HIGHEST HANDICAP** always plays 501 - the other plays 501

plus the handicap difference.
